Sliding pocket door system for two couples of parallel doors disappearing into the same pocket

ECLISSE UNILATERAL
Two doors in the same pocket opening up in opposite directions

ECLISSE ACOUSTIC
Soundproof sliding pocket door system for single door tested to 38 decibels

ECLISSE CLASSIC COLLECTION

SINGLE - DOUBLE 2x4

ECLISSE has found a way to re-invent the pocket door and checked off every box when it comes to eliminating all of the problems associated with pocket doors. We offer a complete pocket door system - galvanized steel frame kit with patented removable track so you never have to break drywall again making potential future maintenance a far less costly and a much quicker task.

Standard sizes available in stock

ITEM	DW	DH
Kits 2x4	24"±48"	80" / 84" / 90" / 96" / 108" / 120"

Dimensions are given in in

Extractable running track

The whole running track mechanism can be removed without breaking into the wall.

Pre-drilled horizontal bars

Quicker application of the drywall. In the ongoing effort to ease the construction work for the installer, ECLISSE introduced a perforated weave obtained by pre-drilling the horizontal reinforced bars. The new micro drillholes allows the screw to enter more easily into the metal sheet, speeding up the installer's work in the application of the drywall.

ECLISSE CLASSIC COLLECTION

SINGLE - DOUBLE 2x6

The first pocket door system which allows you not only to arrive up to 72". The add-on Luce Kit for 2x6 wall frame kits allows you to install wiring in the same wall where the frame is placed for shallow boxes for thermostats, outlets, etc. You can have up to 2 Luce Kits per Single frame kit and 4 on Doubles (1 on each side of the frame). With the Luce Kit, you will be able to make full use of the wall of your pocket door, opening up a whole host of options for interior lighting plans and other functional or aesthetic design ideas.

Standard sizes available in stock

ITEM	DW	DH
Kits 2x6	24" / 48" / 60" / 66" / 72"	80" / 84" / 96" / 108" / 120"

Dimensions are given in in

Easy assembly

The frame has been purposely designed to be assembled very quickly and simply with just a screwdriver.

The kit packaging makes transportation quicker and easier to spread on a jobsite

Door guide

Quick and easy to fit to the frame with no holes to drill into finished flooring, this guide cleverly guarantees a perfectly centered position.

Luce Kit

It is not included with the frame kit and sold separately - only compatible with 2x6 wall frame kits.

ECLISSE CLASSIC COLLECTION

ACCESSORIES

Innovating means developing more targeted solutions and giving customers exactly what it takes to make daily life more comfortable. ECLISSE has designed and patented a series of automations and various accessories that make each pocket door system unique.

ECLISSE BIAS®

Soft close with anti-slam technology for single and double doors. This soft closer is fully integrated inside the track and invisible from the outside, gently slows down the door in the closing phase with a smooth quiet motion.

ECLISSE BIAS® DS

Bidirectional soft close with anti-slam technology for single and double doors. This bidirectional soft closer is fully integrated inside the track and invisible from the outside, gently slows down the door in both the opening and closing phase providing a smooth quiet motion in both directions.

SELF-CLOSING SYSTEM

The Self Closing system is manually operated and once opened the door closes automatically. This mechanism allows you to have a hold open feature and with the simple touch, the door will close by itself. The door closing speed can be adjusted at any time without removing the door.

DOUBLE DOOR COORDINATION

This device allows you to open and close the two door simultaneously by moving only one panel. The Double Door Coordination Kit is to be used in conjunction with the ECLISSE BIAS (Soft Closer) allowing for the doors to close softly and quietly.

ECLISSE ANTI SLAM - HD - ADA Compliant Soft Closer

ECLISSE Anti Slam- Heavy Duty is a soft closer fully integrated inside the track and invisible from the outside. The Anti Slam HD is a mechanism equipped with an oil piston which slows down the door and in both the closing and opening phase (need qty x2 for both functions).

Meets ADA requirements (less than 5lbs of force to operate)

ECLISSE PUSH&PULL

The Push&Pull is an accessory that with light pressure, allows the door panel to be pulled out from the pocket to facilitate the door grip, thus easing its closure.

BRACKETS/ CLAMPS FOR FRAMELESS GLASS DOORS

The ECLISSE frame kit allows you to use any door you want including frameless glass on the same system. To use frameless glass, you will need either the brackets or compression clamps to be able to install your glass door.

TELESCOPIC SYNCHRONIZATION

A device that ensures a simultaneous and smooth movement of the door panels which slide into the same direction. It can be applied on ECLISSE TELESCOPIC SINGLE and ECLISSE TELESCOPIC DOUBLE

ECLISSE CLASSIC COLLECTION

OTHER PRODUCTS

UNILATERAL KIT

ECLISSE UNILATERAL frame allows two opposite doors to slide into the same pocket. It requires only a single frame's overall dimension, but it hosts two parallel doors going in opposite directions.

JAMB KITS

The jamb kit attaches to the pocket door framework that cover the edges of the door when it is closed so you cannot see the top of the door or into the pocket. This comes complete with gasketing and dust brushes and is available in Primed and Stain Grade. Available for all Classic Collection Systems.

LUCE KIT

Allows you to install wiring in the same wall where the frame is placed for shallow boxes for thermostats, outlets, etc. With the Luce Kit, you will be able to make full use of the wall of your pocket door.

ACOUSTIC KIT

Magnets, Bumpers, Gaskets and Upper/Bottom Weatherstrip for sound insulation. ECLISSE ACOUSTIC is an integrated system with high soundproof performance designed to reduce the noise between rooms providing all of the advantages of a pocket door along with the acoustic comfort.

A great warranty

The ECLISSE steel pocket door system is guaranteed for 12 years.
